# DURGA SAI BHARADWAJ RACHARLA

FULL-STACK DEVELOPER
Halifax, NS | 4168576674 | bharadwajdurgasai@gmail.com | linkedIn

## Objective

Full-Stack Developer with 3.5+ years of experience building end-to-end web applications. Strong backend foundation in Java, Spring Boot, and microservices architecture, with hands-on experience in REST API development, database design, and cloud deployment on AWS. Proficient in React.js on the frontend, with a focus on clean, maintainable code that scales.

---

## Experience

### Tata Consultancy Services | Software Engineer | 2022-2023

- Built and maintained multiple Java-based applications using Spring Boot within an Agile environment, consistently meeting business requirements and ensuring stable performance across releases.
- Developed responsive and dynamic user interfaces using React.js, translating business requirements into clean, user-friendly frontend experiences.
- Optimized PostgreSQL queries to significantly reduce data retrieval times and improve overall system responsiveness.
- Architected secure REST APIs using FastAPI to integrate machine learning models into production systems, supporting high-volume request handling.
- Automated CI/CD pipelines with Jenkins, streamlining deployment workflows across Java and Spring Boot applications.
- Collaborated with an Agile team to build data-driven solutions using Redis and Kafka, enabling near-real-time processing of large-scale datasets.

### Medibliss Transactions | Junior Developer | 2020-2022

- Delivered complete web applications independently using React.js and Java, building both client-facing websites and the company's own internal platforms from the ground up.
- Took ownership of critical frontend and backend features, directly improving user engagement and business outcomes.
- Monitored live application performance, identifying and resolving bugs and crashes to maintain high stability and smooth user experience across platforms.

## Education

**Nova Scotia Community College| IT Programming in AI | GPA: 3.9 | May 2025**

Relevant Coursework: Machine Learning, Data Analytics, Deep Learning.

**Humber College | AI with ML | GPA : 3.7| Apr 2024**

Relevant Coursework: NLP, Image Processing and Computer Vision, Neural Networks.

**Jawaharlal Nehru Technological University, Bachelor of Computer Science Aug 2020**

Relevant Coursework: C, Java, Python, DSA, Computer Networks, MySQL.

## Technical Skills

- **Programming Languages**: **Python**, Java, SQL, JavaScript
- **Web Development**: Flask, Django, **React.js**, **HTML5**, **CSS3**
- **Database Management**: PostgreSQL, MySQL, **MongoDB**, Redis
- **Cloud & DevOps**: AWS (EC2, S3, Lambda, SageMaker), Docker, Jenkins
- **Version Control & CI/CD**: Git, GitHub, GitLab, Jenkins
- **Software Development Tools**: JIRA, Visual Studio Code, Jupyter Notebook
- **Agile Methodologies:** Experience working within Agile teams

---

## Projects

### Trackr – Full stack AI Job Application Tracker

- Built a full-stack job tracking platform using **Spring Boot** and React, with **JWT**-based authentication, a **MySQL** database, and a clean dashboard to manage and visualize application progress.
- Developed a Chrome MV3 extension that scrapes job details from any job posting page and sends the content to the backend, where Claude Haiku extracts the position, company, location and saving it to the tracker in one click.
- Integrated Gmail API with **OAuth2** to automatically detect job-related emails and sync application updates directly into the tracker without any manual input.
- live

### Crypto Trading Platform – Live Market Dashboard

- Built a microservices-based crypto trading platform using Spring Boot for user authentication and FastAPI for real-time market data, integrating live price feeds from Binance and Kraken APIs.
- Designed loosely coupled microservices communicating over REST, with each service owning its responsibility for easy scalability and maintenance.
- Developed a React dashboard with interactive charts, live price tracking across multiple trading pairs, and a market overview with trend indicators.
- Containerized all services using Docker and deployed the full application to AWS using EC2 and S3, keeping it within free-tier limits.
- Integrated PostgreSQL for persistent user data storage and Redis as a caching layer for real-time price feeds, reducing latency and improving performance across services.

### Ecommerce Website – Next.js & Typescript

- **Consolidated React Projects:** Merged multiple projects including a cart app, task manager, navigation bar, sidebar modal, and an Unsplash images gallery into one dynamic portfolio.
- Built a full-stack e-commerce application using Next.js and TypeScript, with Prisma as the ORM connected to a Supabase PostgreSQL database for product and order management.
- Integrated Clerk for user authentication with role-based access, and Stripe for secure payment processing and checkout flows.
- Handled product image uploads to Supabase Storage and built an admin dashboard for managing inventory and orders.
- live
